

## Our Story

Back in October myself, my husband and our daughter were flicking through the Milton Keynes Citizen, looking for things to do that weekend, we came across an ad for Hula's open day and decided that would be a nice way to spend a Sunday afternoon!!! I need to stress at this point we were defiantly NOT looking for a pet of any kind!! That was until we met HENDRIX! Then everything changed, we spoke to some staff just enquiring what the process for adoption was, (just for future reference) in the car driving home we played with the idea, asking all the major questions, how, where, how much when etc. By that evening we were filling in the application, (again, just in case we decided to take it further) by the Monday morning we had emailed Hula to say our application was in the post! The rest as they say, is history. Three weeks later we welcomed Hendrix in to our home and hearts!!! And have never looked back!!!

## Hendrix Story

I was so excited to be going to my new forever home, I had a new mummy & daddy and a very special big sister. They brought me a new bed and lots of new toys to play with. I was a bit nervous to begin with as everything was new to me but I soon settled down and decided that I liked to have lots of cuddles with my new family. Turns out I am a bit of a smiler.

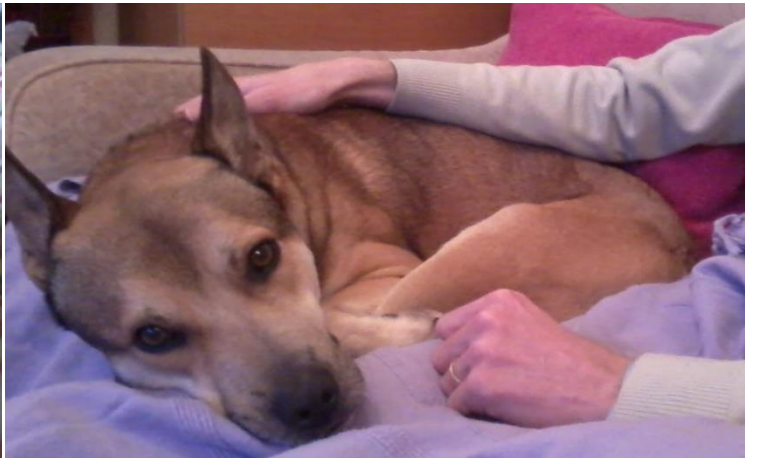

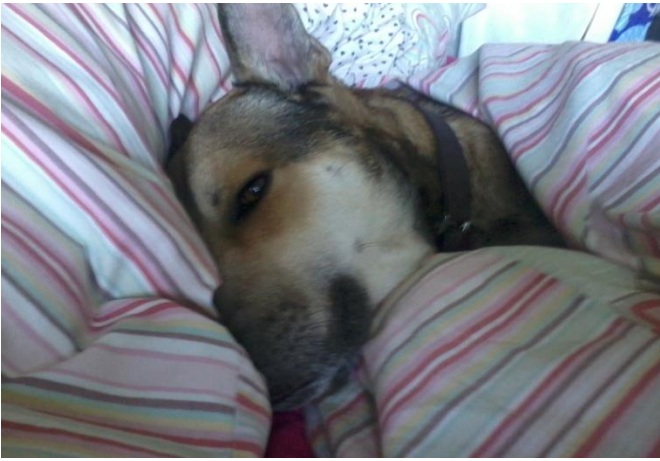

Unfortunately the week after I arrived my new mummy was taken into hospital to have an emergency operation, I couldn't understand where she had gone, and missed her very much. But she was soon home again, and I made it my job to look after her. I stayed by her side on the sofa keeping a close eye on her recovery.

Whilst she was recovering I behaved myself and didn't pull on the lead. Now she has made a full recovery we have lots of fun exploring new walks, I especially like it when we go to the woods where I can chase squirrels.

I have decided that I like to keep my new Mummy & Daddy company on the sofa when they watch TV, and sometime I like to give them special morning cuddles on the bed. Although they say I shouldn't they can't help themselves as I'm just too cute to resist.

My new sister takes me for a walk every day after school and we play catch in the park, she seems to love running around as much as I do, so much that we wear each other out and have to have a snooze.

I have a sensitive tummy so I am fed on Chappie now, which means I have put on some more weight, so no more skinny ribs for me!! The best thing about my new family is that they give the best cuddles!! I really am a very lucky boy in my new home. Thank You Hula for giving me a second chance and finding me my new family.
